

VASC **•••**age

---

Centre on Clinical Stroke Research

*Science fights stroke*

# GLOBAL CHALLENGE

## vascular health

“ *Life expectancy is rising continuously. Unfortunately, the years gained are often dominated by declines in physical and mental capacities: On average everybody lives in disability for 15 years! The forecasted burden caused by devastating diseases such as stroke is alarming. We believe that controlling vascular ageing holds the key to healthy ageing! This firm conviction is the rationale behind VASCage.* ”

Prof. Dr. S. Kiechl, CSO VASCage GmbH

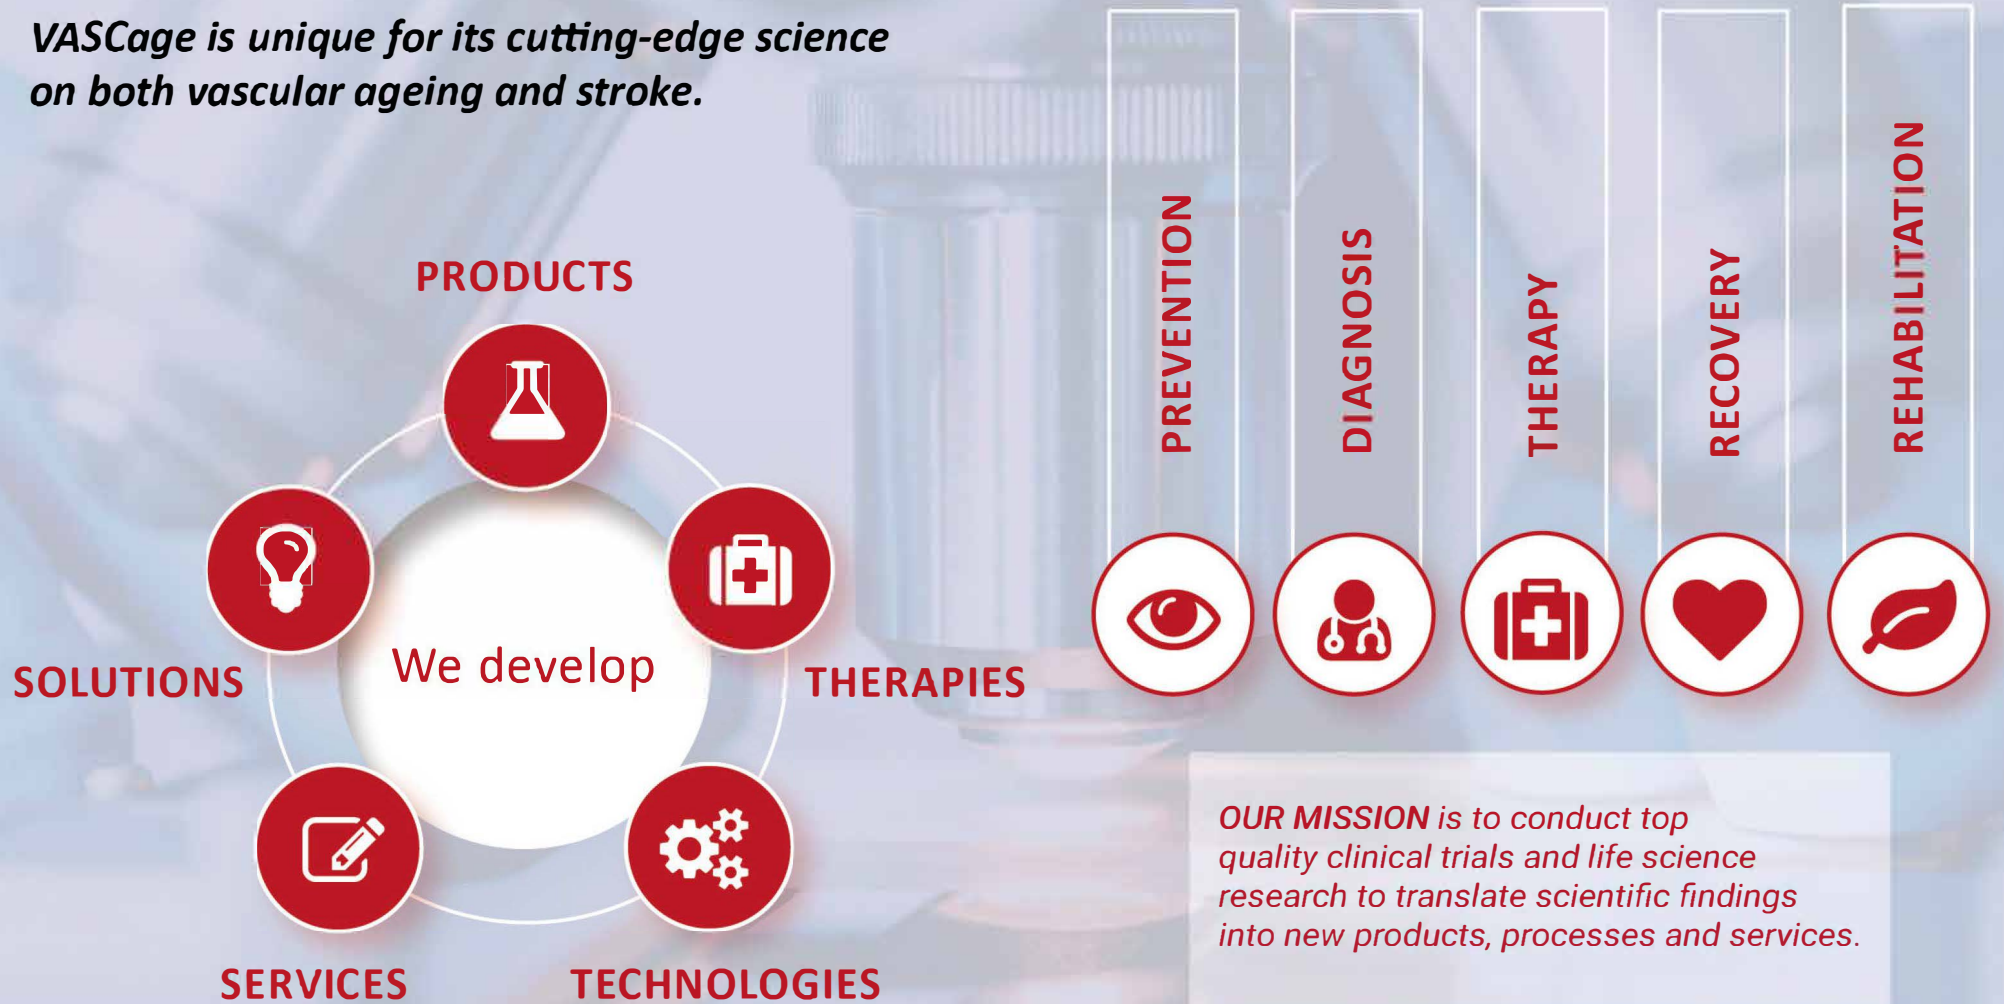

**OUR VISION** is to extend the healthy lifespan by prevention and optimal treatment of stroke.

# TRANSLATIONAL RESEARCH

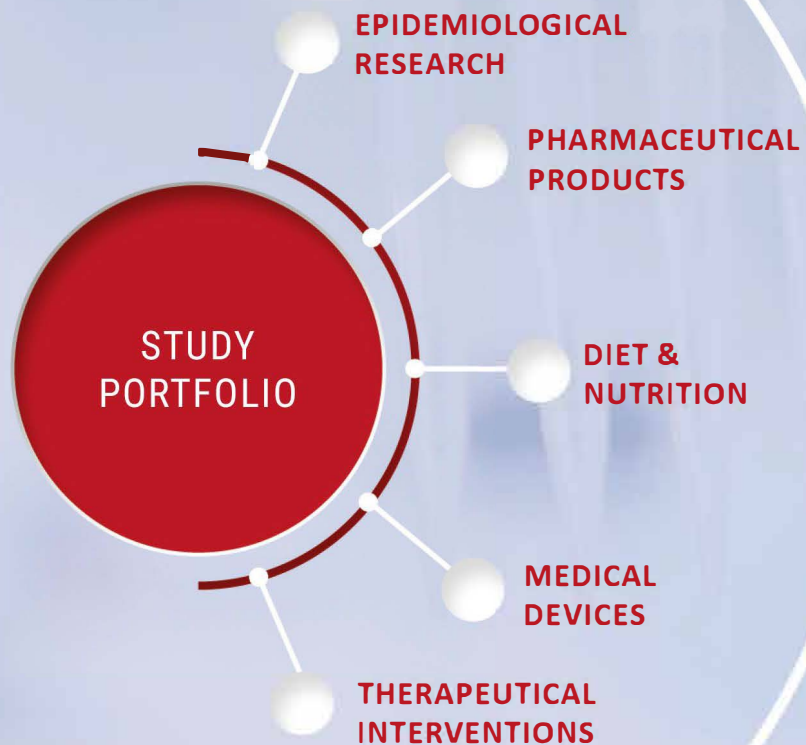

*for the clinical market*

*VASCage is unique for its cutting-edge science on both vascular ageing and stroke.*

# CLINICAL TRIALS

*for academia and industry*

**VASCC**••age

- *operates in close collaboration with multiple clinical trial centres and stroke units*
- *provides access to relevant patient groups and population cohorts*
- *cross-links the comprehensive competences of its partners*

**tailor-made  
trial settings**

***VASCage manages and supports the  
conduct of national and international clinical trials.***

# WORLDWIDE NETWORK

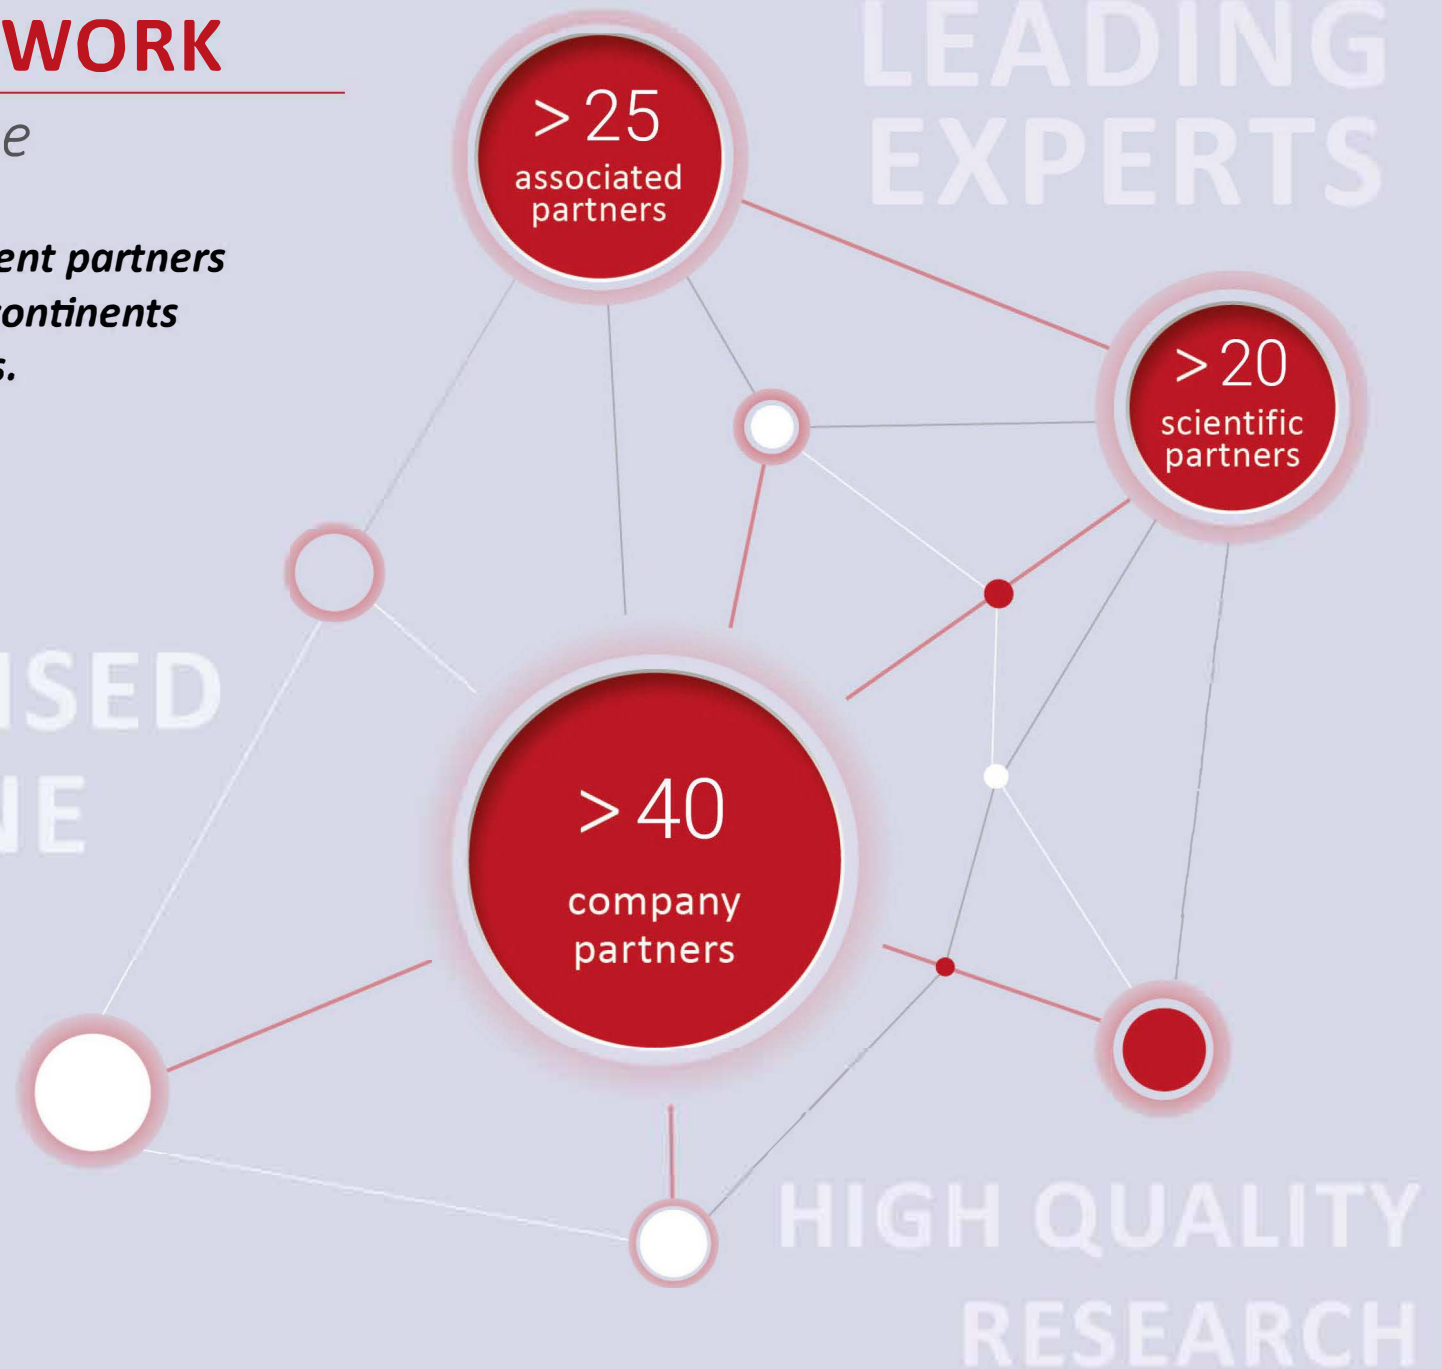

*interdisciplinary expertise*

***VASCage collaborates with excellent partners in more than 15 countries and 3 continents and engages in new cooperations.***

# LEADING EXPERTS

# PERSONALISED MEDICINE
